D'Israeli and Gladstone.

Many long years have passed since the English nation have seen their two leading statesmen, occupying such a position in Parliament as that occupied by the leaders of to-day. It takes us back to the stormy days of Pitt and Fox, and recalls a struggle as eventful in its results. The contest of the latter had much to do in forming the policy of the century that has passed; the contest of the former, in the same way, will have much to do in shaping the policy of the century to come; nor is the similarity of the position of the leaders of the past and present generations less remarkable in minor respects. We have, however, to deal with the living, the present and the future, and the question most interesting to ourselves and those who, in the course of nature follow us, is, which of the two will triumph finally in the desperate struggle now going on? The present position of Mr. D'Israeli is like that of many brilliant men of undoubted intellectual power and attainments, whose real effectiveness ceases on becoming an absolute leader. None of the principal English journals attempt to deny or palliate in earnest the mistake he has made in dragging the Queen's name into the contest upon the Irish Church, and declaring that his own policy "had been and would be, and the policy of the House of Commons ought to be governed by the expressed wishes of the Monarch." The man, as Premier of England, who would thus violate the constitutional rule of the country by attempting to coerce the debates of Parliament, by the expressed wishes of the Monarch, attempts what is wrong, what is impossible, and upon the face of the assertion, seeks the revival of practices that have perished forever. We can scarcely imagine a man so able and experienced as the present Premier, ruining a life's reward by a moment's vanity. Yet so it is. Such was the anger created by Mr. D'Israeli's words, and the concurrent threat of the Duke of Richmond, "that if the Commons' behaved badly, Parliament should be dissolved," that the tone and temper of the following sittings are described "as resembling a coal-oil conflagration at one time, and a glycerine explosion at another." Nor can we wonder. Such a declaration is a relapse or retrogression in the working of the constitutional rule which ought not to be sanctioned except in cases of the greatest importance or danger. The country suffered enough in earlier times by threatening the House with the influence of the Crown, and the practice cannot be repeated with impunity in this age.

us America actually, it lost us Ireland morally; it set strife between the mass of the people and some of the most valuable institutions of the country. Happily, it has been unknown as yet in the present reign; but we live in times when even the appearance of its renewal in the slightest degree would be fraught with evils and dangers greater than those which would have been produced in former times from the same cause multiplied tenfold.

Mr. Gladstone, who has been suffering again, perhaps in a larger degree, by the supposition publicly expressed that the monarch might not have acted as insinuated, for it belies her whole life—and so we find the great, and probably the last Conservative Premier in the hour of triumph, powerless and beaten, with no other alternative to close but folly or falsehood. Mr. Gladstone stands by, and in the majesty of his power turns all this to advantage but remains calm, moderate and cautious. He acts with instinctive quickness that if he were to force the expulsion of the Ministry from office, by moving a vote of want of confidence, as urged by some of the less prudent of his party, he could not separate the Queen's name from the issue, or avoid events which would be most calamitous at present, both to the country and his own policy. Some think he hesitates from timidity, but that cannot be, for such a motive is unknown in his career. All but his most violent opponents give him credit for true loyalty and patriotism in his present attitude and forbearance. To us, it appears, Mr. Gladstone is quietly biding his time, to return to the position, he of all men now is alone capable of filling. By acting as he has done, Mr. D'Israeli has hurt himself, and the Conservative party beyond redemption. Whilst Mr. Gladstone remains what he is, no other man, in his day, can long be leader of the House of Commons, or the representative of the Government. Since the early days of Pitt, no man, except, perhaps, Sir Robert Peel, has prayed himself so capable or become so powerful. Taken altogether the disestablishment of the Irish Church is an epoch in our history, though only incident to the progress of ideas and parties of the present day; and we thoroughly agree with the *Spectator*, in regarding Mr. Gladstone as the man of England; and that since the emancipation of our West Indian slaves, the cause of true freedom has had no such triumphs in our country as under his guidance.

ST-1860-X.
A great French physician says: "More than half of the disease in the world comes from neglect to fortify the system against changes of climate, weather and food. The great secret of health is to keep the condition of the Stomach and Blood regular and uniform, so that changes from Heat to Cold, from Dry to Damp, etc., cannot upset the machinery of the body and breed disease."
Now, it is a fact, positive and well-known, that there is no such bulwark and assistant for the Stomach as
PLANTATION BITTERS.
This splendid Tonic is now used by all classes of people for every symptom of a "Stomach out of order."
The secret of it is this: Plantation Bitters are certain to correct the juices of the Stomach, set all its machinery at work and enable it to resist and throw off the approaching danger. The tendency of the operations of Nature always tends towards a cure; all she needs is a little assistance at the proper time. If we much more reasonable and sensible it is to help her along with a gentle, yet powerful tonic, than to deplete and weaken and defeat her curative processes with poisonous drugs and fiery mixtures, which only stupify and plant the seeds of disease and death.

Important Certificates:
"I owe much to you, for I verily believe the Plantation Bitters have saved my life."
REV. W. H. WAGGONER, Madrid, N.Y.
"I have been a great sufferer from dyspepsia, and had to abandon preaching."
REV. J. S. CATRON, Rochester, N.Y.
"I have given the Plantation Bitters to hundreds of our disabled soldiers with the most astonishing effect."
G. W. D. AVENUE, Superintendent Soldiers' Home, Cincinnati, O.
The Plantation Bitters make the weak strong, the languid brilliant, and are exhausted Nature's great restorer. The public may rest assured that in no case will the perfectly pure standard of the Plantation Bitters be departed from. Any person attempting to imitate the Plantation Bitters, or by the signature of the proprietor, is a swindler and impostor. Beware of re-filled bottles. See that our Private Stamp is UNIMPEACHED over every cork.
Sold by all Druggists, Grocers and Dealers throughout the world.

FOR HORSES
It is an indispensable and valuable remedy in all cases of Scurvy, Splint, Ring-Bone, Wind Galls, Bruises, Strains, It should be kept in every house, camp and stable. Accidents will occur, and promptness is efficiency.

Monday Morning, July 6, 1868.

CALEDONIAN SOCIETY.—The picnic on Saturday, given by this Society, was certainly the best attended and most successful of the season. It was wisely held, on the beautiful grounds of J. D. Pemberton, Esq., and in the afternoon there must have been over 300 people assembled, old and young, together. About 1 o'clock, Mr. Russell, the President, attended by the gentlemen selected to assist him in the opening ceremonies, was escorted to the platform by Captain J. McKay, of the Favorite, playing a Scotch national air upon the bagpipes. The platform was occupied by the President, Dr. Tolmie, R. V. Thomas, Somerville, and Mr. Legh Harcourt. The President's opening address was exceedingly appropriate, and that of Mr. Somerville's in his most happy and amusing style, but sufficiently earnest and national to be impressive. Dr. Tolmie followed, and Mr. Harcourt closed this part of the proceedings. Mr. Somerville and Mr. Harcourt, both, drew attention to the prominent and important part taken by Alexander Hamilton, a son of a Scotchman, in the formation of the American Government and its Constitution, and afterwards illustrated how the Scotch mind, by its capacity, energy and firmness had influenced the world for good in all countries when brought to bear upon the principal transactions of both public and private life. The speakers were well received and heartily applauded. After this the general amusement commenced, and a most happy day's pleasure was not often enjoyed on the island. The Scotch reel, to music by the bagpipes, drew forth dancing capacity of several ladies, whose powers would get shame many of our modern belles, however active they may be on the "light fantastic" and elicited the warmest praise. Archery, football, racing, jumping, and other athletic games were vigorously pursued. The following is a list of winners: Running race, 150 yards, William Tolmie; do 250 yards, Wm. Reynolds; Running race, 100 yards, George Messersmith; do 150 yards, Hop, Step and Leap, Wm. Robertson; Hurdle race, Wm. Tolmie; Race for boys, B. Derham; Tossing the Caber, Alex. Young. Neither were the joys of childhood forgotten, the platform several times having been given up to the little children, whose dancing in the polka and waltz was one of the brightest features of the day. The "victualing department" was under the able management of Piper, of Government street, whose ice-creams and good dinner gave entire satisfaction. The best of liquors were dispensed by Mr. Robertson. The arrangements all through reflected credit on the management. It was after ten o'clock at night before the party broke up, taking away with them the recollections of a day which will make its anniversary earnestly and eagerly anticipated.

FOURTH OF JULY AT PORT TOWNSEND.—The residents of Port Townsend celebrated the anniversary of their country's natal day most enthusiastically. Committees were formed several weeks previous and invitations were extended to Victoria and various ports on the Sound. About one hundred and fifty persons—Britishers, Germans, French, and others, as well as Americans, left this city by the Enterprise on Saturday morning at 8 o'clock and took part in the ceremony, which mainly consisted of a procession, firing of salutes, an oration delivered by Mr. Garfield, a large picnic, free to all, a horse race on the principal street, fire works and a ball given at the Masonic Hall in the evening. Our Victoria visitors speak kindly of the handsome manner in which they were received by the people of the place. The presence of the U. S. frigate Porpoise, in the harbor, and also of the cutter Joe Lane, added additional interest to the day. The use of the band from the flagship was kindly given by Rear Admiral Thatcher. The Enterprise on entering Port Townsend harbor steamed around the men-of-war; cheers were given and the crew manned the yards in compliment of the visitors, who returned here at half-past ten yesterday morning, making a nice run over in less than three hours.

THE "NAVAL ATHLETIC" SPORTS TO-MORROW.—The following is briefly the programme to be carried out on the cricket ground at the Halfway House, Esquimalt Road, under the patronage of the Admiral, by the officers and men of the squadron at Esquimalt, commencing at 1:30 p.m. to-morrow, weather permitting:—Throwing the hammer, putting the shot; standing wide jump; running do; standing high jump; high jump, running; climbing the greasy pole, prize of a turkey and stuffing, open to all; flat race for officers; do. for seamen; also for petty and non-commissioned officers, marines and boys; walking contest; hurdle race; hopping race; pair race, with legs tied; race backwards; throwing the cricket ball; sack race; dancing a hornpipe, etc. Prizes will be given to the winners in each contest. The Zealons Band, which will be in attendance, will give selections and dance music from the best composers.

RAIN FALL.—Commander Liddell, of H. M. ship Zealous, has favored us with the following half yearly account of the rain fall at Esquimalt:

| 1868 | Total fall inches. | Showery days | Rainy days |
|------|--------------------|--------------|------------|
| Jan. | .86 | .87 | 2 |
| Feb. | 4.52 | 5.10 | 10 |
| Mar. | 1.18 | 1.47 | 15 |
| Apr. | .69 | .90 | 7 |
| May | .62 | .71 | 4 |
| June | 1.52 | 1.86 | 3 |
| | 9.29 | 10.91 | 45 |

Greatest fall in 24h. 1.70 on Feb 12. Rainy days are those on which 25 or more of an inch fall; showery days, those on which less than 25 of an inch falls.

The fall at the dockyard is greater than that at the Admiral's, owing to the gauge being in a more exposed position, and is the one to be used when comparing the Esquimalt rain fall with that of other places.

FOURTH OF JULY.—The day, in honor of Americans, was generally observed as a holiday by our citizens. From the fact of its falling on Saturday, on which day but little business is transacted in Victoria, few stores were open in the morning, and those only until 11 o'clock. A large party went to Port Townsend on the steamer Enterprise (chartered by the Mechanics' Institute) to join in the celebration at that place, and returned early yesterday morning. A number of private picnics and excursions to favorite resorts in our neighborhood had been gotten up by other parties, so that by noon the town was comparatively deserted. Flags of various nationalities were flying from early morning from most of our public buildings. A salute was fired at noon from the U. S. vessels lying off the harbor.

THE LATE HON. THOMAS D'ARCY MCGEE.—We are pleased to learn that a petition to the Government is now in course of signature amongst the Irish members of the House of Commons, praying that a vote of money may be made out of the Royal Bounty Fund to the surviving sister of the late Mr. McGee. By the assassination of her brother—who was her sole support for years past—she has been rendered entirely destitute, and as it will be a graceful act on the part of the Government to make the grant we have no doubt that a favorable answer will be at once returned to the petition. We believe the amount will be £100 per annum.—*Irish Paper.*

THE SAN JUAN CABLE.—Superintendents Haines and Lamb left on Saturday to repair the San Juan Cable. The steamer Emily Harris and the Telegraph Co's propeller Lizzie Horner arrived from the Sound on Saturday, and were taken out with the necessary material for the purpose.

LUNACY.—A lunatic confined in the jail, and in the same cell with another poor fellow similarly affected, was badly beaten yesterday evening with an iron bar, which it seems the aggressive one wrenched from the window of the cell.

QUEEN'S BIRTHDAY COURSE.—The Queen's Birthday course was contested by only two of the boats advertised to start, and was won by the Maple Leaf crew against the Italians in the Phantom. The Zealons did not start. But few persons were present to witness the interesting race.

FIRE.—At one o'clock yesterday morning the house formerly occupied by Mr. P. Everett, on the old Esquimalt road, was burned down. The Fire Department turned out but did not proceed the whole way, it being deemed useless. Insured.

CONCERT.—It will be seen by advertisement that the box office of the Theatre will be open on Tuesday and Wednesday, from 11 till 1 o'clock, for securing seats. Early application will be necessary, as the tickets are meeting with rapid sale.

THE SHIP AID.—Mr. Alfred Fellows, of this city, purchased the bark Aid at Uxalady, W. T., on the 30th, for the sum of \$6000—sold by order of the U. S. District Court Marshal.

HEAT.—Saturday and yesterday were intensely hot and oppressive. At 5 p.m. yesterday the thermometer stood at 81 in the shade.

The steamer Active left for Nanaimo yesterday morning and will leave for Portland about the middle of the week.

HOLLOWAY'S OINTMENT AND PILLS.—Unsolicited Testimony.—Mr. Rippon, Hairdresser of Exeter, in a letter dated July 1st, 1868, writes: "My wife had been a great sufferer for several years from bad legs. After trying many different applications for months together to no purpose, a lady strongly recommended your ointment, and I do assure you we feel most thankful to her and myself for the perfect cure they have effected. My wife is now able to take a walk of four or five miles with comfort. Next may your pills, which I only hope it may be the means of inducing other sufferers to use your admirable remedies, which have proved a blessing indeed to us." Such testimonials are indisputable.

LIQUOR CARBONIS DETERGENS

Concentrated Alcoholic Solution of the

COAL TAR

[Extract from the Lancet, Dec. 22, 1866]

Liq. CARBONIS DETERGENS.—We are very sceptical of the

that we tried the liq. carbonis detergens, and found it to be a concentrated alcoholic solution of the constituents of coal tar, and to contain all the active ingredients of the tar, to wit, benzene, naphthalene, and phenic acid. The addition of water, with agitation, makes a durable emulsion, in which the tar remains in a state of fine suspension, almost equivalent to solution. Our therapeutic experience of the preparation is very satisfactory indeed. In our hands it has been a most effective agent in the case of various skin diseases, especially of the chronic eczematous class; and one case of psoriasis which had resisted all other kinds of treatment, speedily got well under the application of the liq. carbonis detergens. We esteem it a very valuable addition to our list of skin remedies, and worthy of a very extended trial by the profession. In the above classes of disease, and in various others, such as tetter, alopecia, etc., the preparation is put into the form of soap.

THE BOARD OF DIRECTORS.

The Mechanics' Institute hereby give notice that the Sixth Industrial Exhibition of that Association will be held sometime in August next, in a building to be erected for the purpose in Union Square in this city. Every preparation will be made to accommodate exhibitors and visitors with a view to make the Exhibition profitable, instructive and pleasant to all parties concerned. During the three years which have intervened since the holding of the last Exhibition in this city the manufacturing, mechanical, scientific and useful and ornamental arts have made unprecedented progress on this coast, and it is believed that the proposed Exhibition will exceed any other in value that has ever been held on the shores of the Pacific.

The plan of building to be erected, which has been adopted by the Board of Directors, it is believed will prove to be the best adapted, both for display and convenience of the public, of any building ever erected in the State. The building will be perfectly water tight, being covered with a sludge roof, so that no damage from the elements can be anticipated.

All parties who are interested in any of the branches of Manufactures, Mechanics, or the Arts and Sciences are invited to exhibit in the proposed Exhibition, and to share in the publicity and consequent profit which always attends such enterprises. Suitable premiums will be offered, and the specific date of opening the Exhibition will be published at some future time.
